LANGUAGES

- English
- Hindi
- Marathi

SKILLS

- Python
- SQL
- Machine Learning
- Deep Learning
- Data Preprocessing
- Communication
- DBMS
- Numpy & Pandas
- Multitasking

CERTIFICATES

- **Python (IBM)**
- **SQL**
- **Machine Learning**
- **Deep Learning**
- **Analytics with Python**

ABOUT ME

Enthusiastic Aspiring Data Scientist eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of Data Collection, Data cleaning, Modelling and Evaluating machine learning models. Motivated to learn, grow and excel in IT Industry.

EDUCATION

2018-2022   Savitribai Phule Pune University
Bachelor of Engineering

2017-2018   Stete Board Of Maharashtra
HSC

2015-2016   Stete Board Of Maharashtra
SSC

PROJECTS

Travel Package Prediction

GitHub : https://github.com/Ankita-More/Tour_Package_Prediction

- To predict which customer is more likely to purchase the newly introduced travel package.
- Using EDA and Pre-Processing of Data cleaned dataset and removed skewness in order to get effective prediction results.

Customer Churn Prediction

GitHub : https://github.com/Ankita-More/Customer-Churn-Prediction

- A bank wants to retain their existing customers who may churn, for that they have to know which Multitasking Abilities MS Office Leadership existing customers have the highest probability of leaving the company, but a machine learning model which predicts the churning rate of customers in a particular bank, Used logistic Regression, SVM, KNN, random forest to come up with the predictions.
- Using EDA and Pre-Processing of Data cleaned dataset and removed skewness in order to get effective prediction results.
